13 CLIMATE ACTION

Local Open Government Initiatives to Fight Climate Change

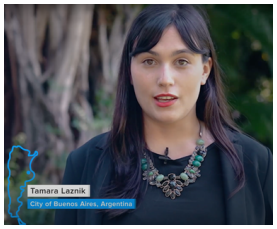
"**Cities are major contributors to climate change.** They consume 78 percent of the world's energy and produce more than 60 percent of greenhouse gas emissions", UN Habitat.

Scotland, UK

Established a network to deliver on participation and engagement requirements across key milestones for climate change policy.

Wassa Amenfi East Municipal Assembly, Ghana

Is co-developing climate resilience initiatives and programs with CSOs, the public sector, business organizations, traditional authorities, and citizens.



Buenos Aires, Argentina

Has an environmental and sustainable development advisory council and, in 2020 launched an open data and accountability portal that presents the city's Climate Action Plan and its progress to allow citizen monitoring.

Yerevan, Armenia

Co-created a program with stakeholders to encourage municipal organizations to carry out green procurement and implement energy saving measures.

17 cities signed the Declaration of Buenos Aires, a document that reaffirms their commitment to climate action in local open governments.
