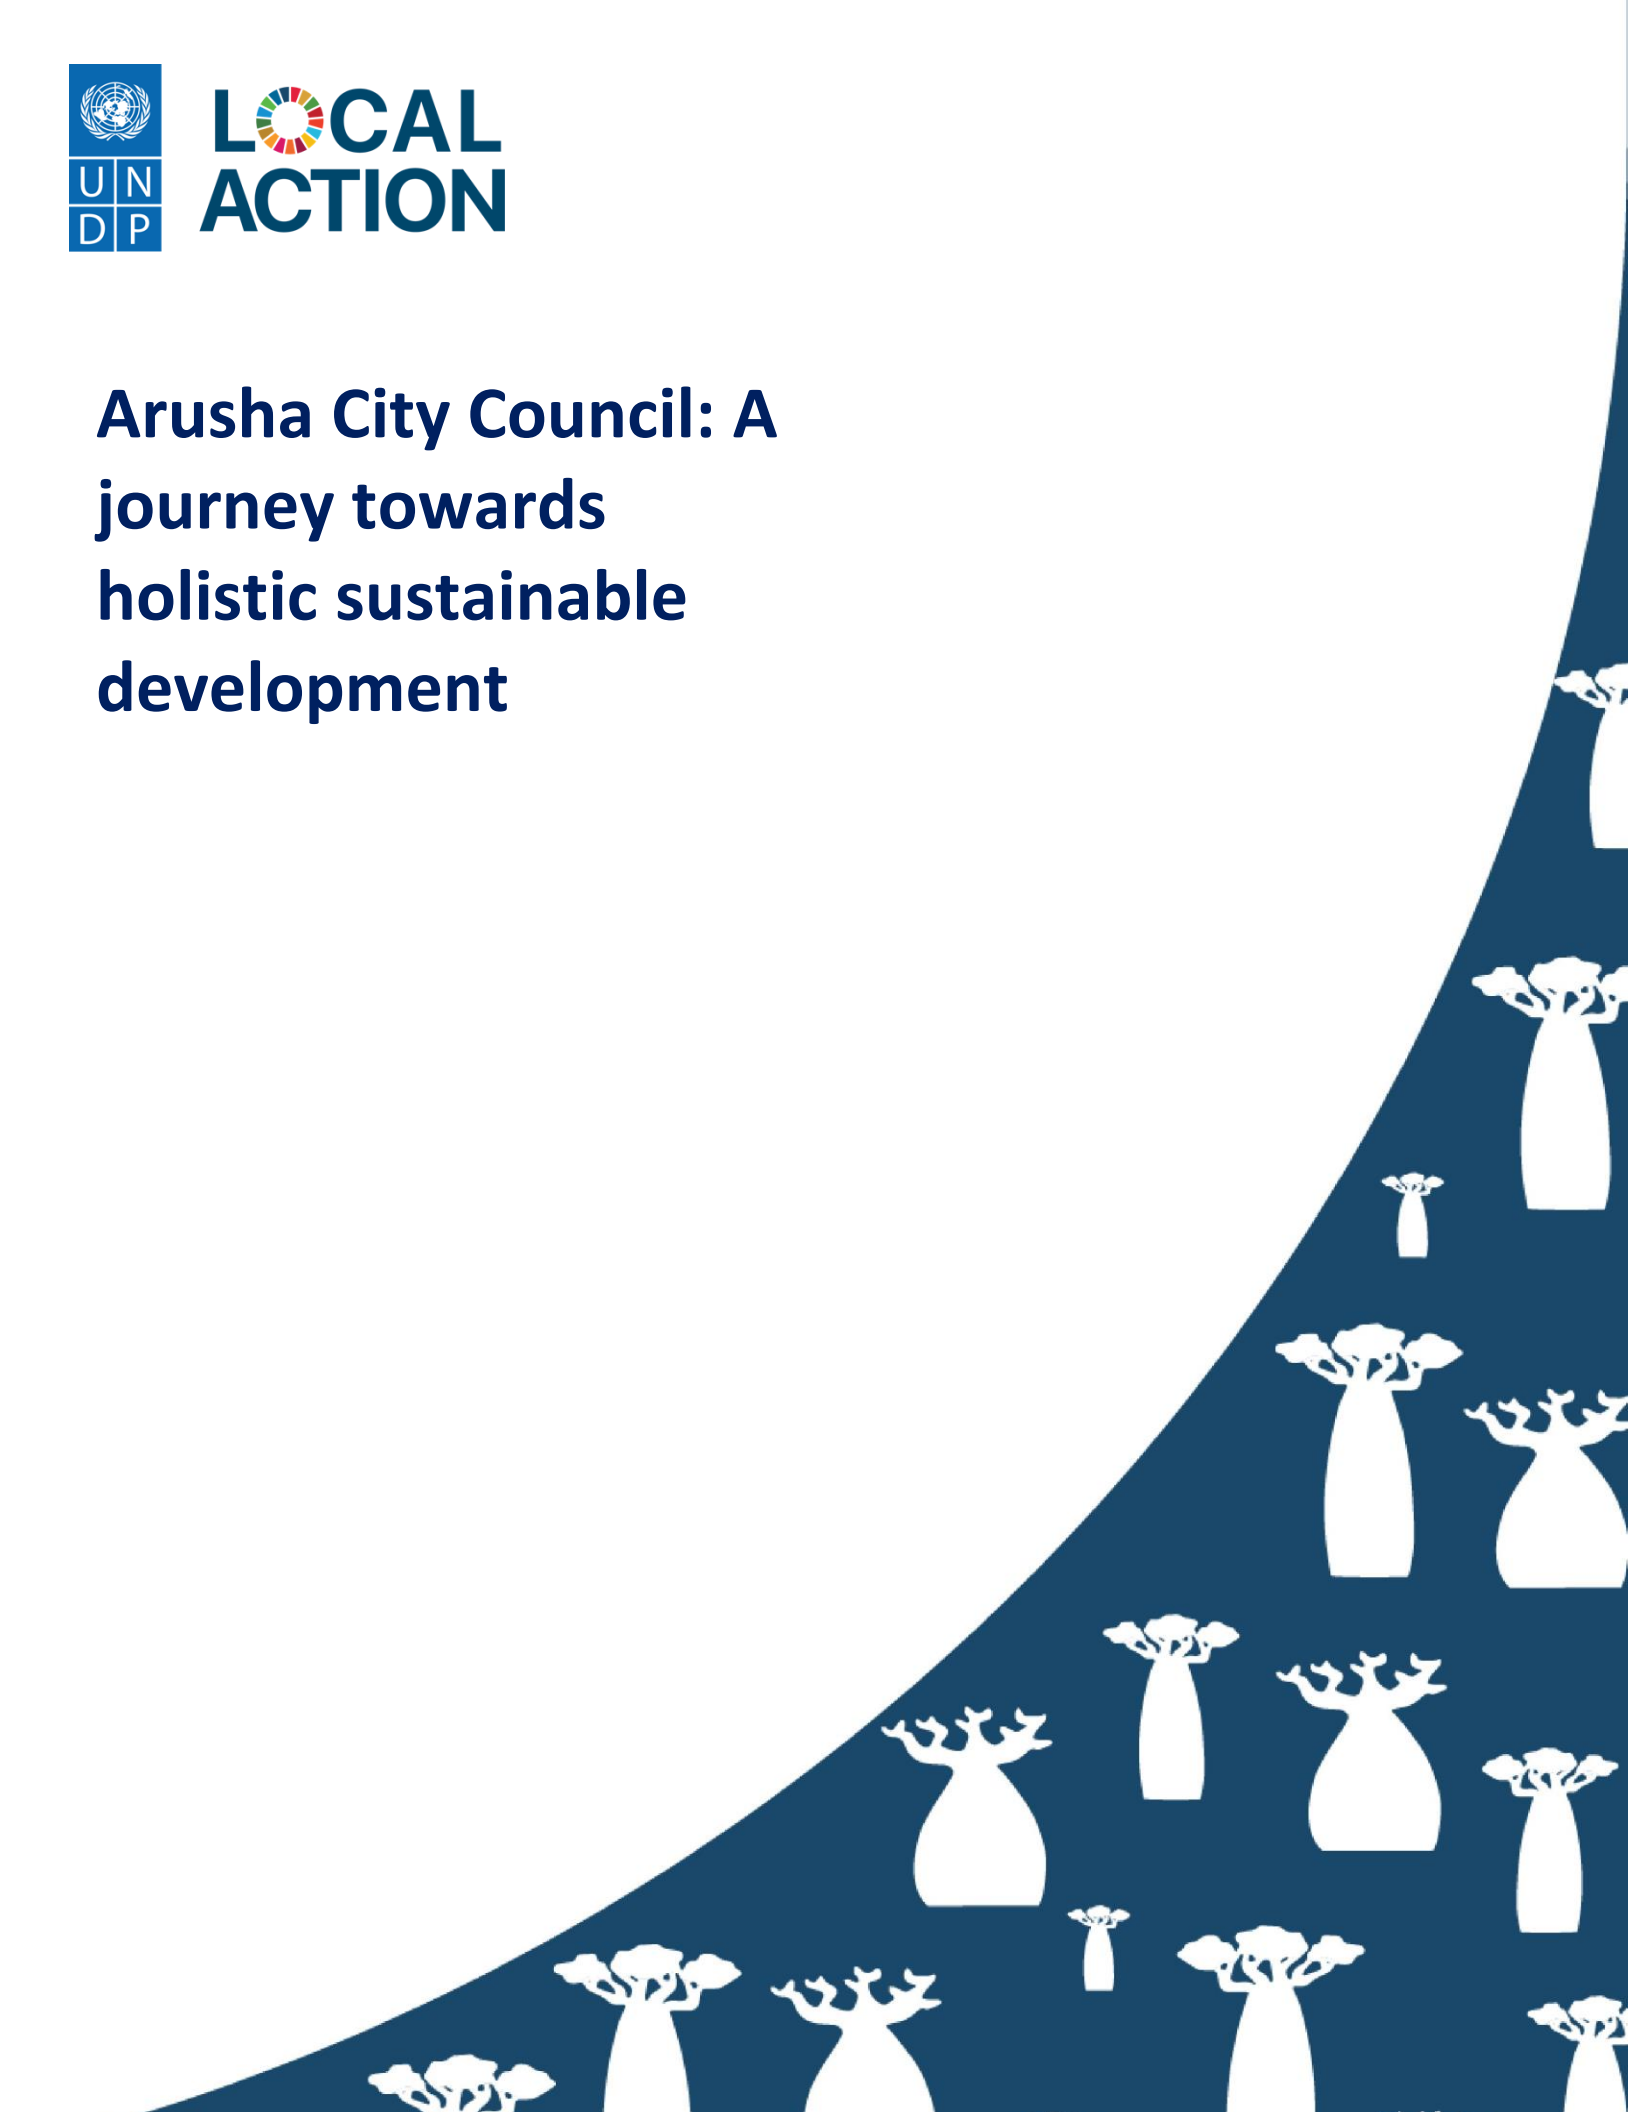
Arusha City Council: A journey towards holistic sustainable development



Arusha City Council: A Journey towards holistic sustainable development

In the heart of Tanzania, Arusha City Council has embarked on a transformative mission to achieve the Sustainable Development Goals (SDGs). Their unwavering focus is on eradicating poverty, ensuring zero hunger, promoting good health and well-being, providing quality education, fostering decent work and economic growth, building industry, innovation, and infrastructure, and taking decisive action on climate change.

Fighting poverty: Empowering communities

Arusha City Council has implemented strategic initiatives to alleviate poverty in the region. In particular, they have initiated community projects such as rehabilitating markets and establishing Machinga centers. These local markets, including Samunge market, Soko Kuu market, and Kilombero market, have provided vendors with a conducive platform to conduct business seamlessly. The primary goal is to improve the quality of life for the entire community, with a key indicator being the community's ability to meet their basic needs.

Building Industry, Innovation, and Infrastructure: Catalyzing Economic Growth

Recognizing the importance of industry, innovation, and infrastructure development, Arusha City Council has made them a top priority. They have undertaken extensive construction and improvement of main roads within the city, including both tarmac and gravel roads. This comprehensive approach has significantly enhanced the city's transportation system, facilitating both local business activities and the booming tourism industry, as Arusha is a renowned tourism hub.

The council's commitment to industrial growth is evident through projects such as the Arusha Meat Company and the establishment of brick industries. These initiatives not only ensure food security but also contribute to increased revenue collection. Additionally, the establishment of block factories aims to bolster the city's own-source revenue, fostering economic sustainability.

Enhancing quality education: Empowering the future

Education is a fundamental pillar of sustainable development, and Arusha City Council has made substantial strides in improving the education sector. They have actively constructed and rehabilitated school infrastructure, leveraging resources from the central government and key stakeholders. With 32 secondary government schools and 49 primary government schools, the council aims to uplift school performance, ultimately leading to improved overall exam results for students.

Promoting good health and well-being: A thriving community

Arusha City Council places great emphasis on promoting good health and well-being within their community. To achieve this, they have focused on constructing hospitals, health centers, and dispensaries throughout the region. Additionally, they have taken significant steps to create a favourable working environment for healthcare professionals. These notable efforts are funded through the council's own revenue collection, as well as contributions from the central government and other stakeholders. The primary goal is to ensure the overall improvement of community health and well-being.

Ensuring environmental sanitation: Preserving Arusha's natural beauty

Recognizing the significance of environmental sanitation as an essential component of their sustainable development agenda, Arusha City Council has successfully implemented initiatives to improve sanitation practices region-wide. By improving sanitation, they have effectively mitigated the risks of diseases such as cholera, playing a crucial role in maintaining Arusha's status as a center of tourism. Furthermore, the council actively seeks out investors to convert waste into useful and profitable products, aiming to generate additional revenue while nurturing a sustainable and eco-friendly environment.

Taking climate action: Protecting Arusha's natural heritage

Arusha City Council has demonstrated its commitment to combatting climate change by introducing extensive tree planting projects across the city. The objective is to actively counter the adverse effects of climate change, with a key indicator being the increase in tree coverage in both private and government areas. These ambitious initiatives contribute to the city's overall resilience and sustainability.

To sum it up, Arusha City Council's journey towards holistic sustainable development speaks to its commitment to improving the lives of its community while preserving the environment for future generations.
